

TRANSFIERE 2018: TECHNOLOGICAL CAPABILITIES

- **Why are you researching?**

Indicate what is the fundamental target of your research from the most general aspect to the most specific one, whether it has a very basic character or has a more applied component.

- **What do your research for?**

Point out the problem that you try to address in your research. Indicate the key points of the work that you are developing

As an example:

If you are working in Cancer, we want you to specify (for example: Pancreatic Cancer, and indicate basic / applied research or developments of new markers, new targets etc) Finally indicate: current state of research (for example in progress, preliminary results or advanced, published / protected knowledge).

Other examples: materials, health materials, ceramic biomaterials, materials based on Phosphate. Materials, Materials for the storage of energy. Batteries. New developments in lithium batteries.

* We request more detail for the other two questions

- **Brief and concise definition of the submitted project.** Highlight its aspects at the level of dissemination and marketing potential.
- **Phase or stage in which your research is at this moment.**
